## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson et al (4,985,332).

Anderson et al disclose a resist material comprising a monomer meeting the limitations for the instant formula b (see column 2). The material comprises a photosensitizer and photoacid generator in an amount meeting the instant claim limitations, and the material is employed in a method of making a circuit component.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyake.

Miyake discloses a radiation sensitive material comprising a resin, an acid generator, and a photosensitizer in amount meeting the instant claim limitations. The claimed monomers meet the limitations of the instant formulas a, b, and c. The composition is employed in a method of fabricating an electronic device. Therefore, the Miyake reference anticipates the instant claims.

### ***Conclusion***

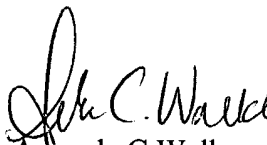

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Noda et al (JP 2000-108259 in view of its English language abstract), Gardner, Jr. et al (5,506,090), and Nozaki et al (5,910,392 and EP 1184723) are cited for their teachings of similar materials.
